Study Aims: Three Questions & Goals
Focus on 5 cancers: breast, endometrial, ovarian, pancreas, & prostate

Practice-Level

1. Improving the quality of the family history

   *Does a tablet-based family health history survey tool improve the completion of the family history?*

   *In conjunction with genetics information support for oncology teams*
Study Aims

Patient- and Family-Level

2. Increasing the proportion of people who get genetic testing

*Can we improve the proportion of patients getting guideline-concordant genetic risk assessment & testing?*

3-arm study of
tailored messaging via mobile optimized web interface (app) vs genetic counseling with motivational interviewing vs usual care

*Exploratory question: Can we improve the uptake of cascade testing?*
